10. Conch Shells

Cameos date back more than 5,000 years, with each cameo reflecting the culture and style of its time period. They were also used as government assets in the many countries around the world, and are considered a reliable investment, as prices of antique, high quality cameos are predicted by many collectors to continue to rise. Most of the items represented in my collection are from the end of the 19th to the beginning of the 20th centuries. I also have some cameos from as early as the 18th century as well as a few modern pieces. The majority of my collection was produced in Italy and England, followed by pieces from the United States, Italy, France, Russia and Germany. The majority were carved from Carnelian and Sardonyx Sea Shell as well as

Mother of Pearl Shell and corals. The collection also contains some hard stone cameos from agate, opal and bone. Using my background as a Graphic Artist and Art Historian, I established criteria which guided the creation of my cameo collection. The major criteria were craftsmanship and esthetics. Secondary criteria included historical value, followed by materials, including metal, stone, bone, etc. This well organized, beautifully created catalog will help the collectors to keep track of this unique and valu-

able asset, whose value will only increase with time as prices of quality antique cameos continue to rise.

his catalog represents the SIL-VER COLLECTION, from "The Antique Cameo Gallery Collection." This collection includes ONLY hand-carved or hand-painted cameos. More than 90% of this collection was created before 1948, before the era of mass-produced, laser carved cameos. The major criteria for this collection included craftsmanship and esthetics, as well as his-

torical value. The collection also comes with a catalog highlighting the artistry and history of each piece. According to cameo experts, the prices of cameos have doubled every 6-7 years and will continue to do so. The price of this collection is 3-4 times less than regular retail price, in order to sell it in one piece. Ac-

companying catalog will help you to keep trackofthisvaluable

asset.

Prices for this collection are 3-4 times less than retail prices.
